

AFTAB ALI

ANDROID DEVELOPER

Gulistan-e-Johar Karachi | aftabramzan567@gmail.com | Phone no : 03493383685

SUMMARY

Android Developer with 1.5+ years of hands-on industry experience developing and maintaining production-ready Android applications using Kotlin and Java. Experienced in MVVM architecture, REST API integration, Retrofit, Firebase, MySQL, and Material Design. Skilled in integrating .NET-based backend APIs, debugging production issues, optimizing application performance, and writing clean, maintainable code. Experienced in collaborating with backend and development teams to deliver reliable mobile applications. Also have working knowledge of Node.js, Express.js, and backend development fundamentals. Environments.

TECHNICAL SKILLS

Strong Skills	Backend & Database	Tools & Technologies
- Android Development (Kotlin, Java) - Android Studio - REST API Integration - MySQL - Firebase - Git & GitHub - MVVM Architecture	- REST API Integration - MySQL - Firebase - Node.js (Working Knowledge) - Express.js (Working Knowledge)	- Git & GitHub - Postman - Web Scraping - Backend Development Fundamentals

PROFESSIONAL EXPERIENCE

Junior Android Developer – Level 3 Back Office Services	Sept 2025 – Present
- Design, develop, and maintain Android applications with a focus on performance and seamless user experience. - Apply clean code practices, MVVM architecture, and Material Design principles to build scalable, production-ready apps. - Collaborate with backend teams to integrate .NET-based APIs for reliable and efficient data communication. - Participate in code reviews to maintain high-quality, reusable, and maintainable code standards. - Debug, troubleshoot, and resolve application issues to improve stability and performance. - Identify performance bottlenecks and implement solutions to enhance app responsiveness and reliability.	

SWAG KICKS - Mobile Development Intern	Feb 2025 - Aug 2025
- Developed Android mobile applications using Kotlin and Java, implementing advanced features and optimizing performance for enhanced user experience - Designed key app functionalities improving navigation efficiency and overall application performance - Implemented web scraping solutions and AI-driven data automation to extract structured data from websites - Created automated scripts for data extraction and processing, reducing manual effort and improving data accuracy - Applied modern Android development practices including MVVM architecture and Material Design guidelines	

EDUCATION

Bachelor of Science in Computer Science (BSCS)	Feb 2022 - June 2026
Karachi Institute of Economics and Technology	

PROJECTS

SmartSwap – Educational Collaboration App
- Developed a feature-rich education-focused Android application that enables students to connect and collaborate based on subject expertise and availability. - Implemented subject-based matching and skill swap functionality, allowing users to exchange knowledge in different subjects. - Built real-time chat and video calling features for seamless communication between students. - Designed and integrated quiz modules and educational video content to support interactive learning. - Developed availability-based scheduling so users can connect at mutually convenient times. - Integrated backend APIs and managed real-time data handling for messaging, user profiles, and session tracking.
ShadowTalkApp
- Developed comprehensive social media Android application with full user authentication system - Implemented user registration, login/signup functionality with secure password encryption - Built post creation, deletion, and update features with real-time content management - Integrated private messaging system enabling user-to-user communication - Designed MySQL database architecture for user data, posts, and messages storage - Developed RESTful API integration for seamless client-server communication - Applied CRUD operations for efficient data management and user experience optimization
